

Promatics helps organizations run, secure and modernize their technology, and helps health programs and public agencies measure and improve their work. We combine program evaluation and data skills with IT, systems integration and ERP expertise, so programs can measure what matters and run on systems that work. Engagements are delivered nationwide from Houston, Texas, mostly remotely, with on-site work arranged as needed.

CORE COMPETENCIES

Health programs and evaluation: program evaluation, needs assessments, data analysis and reporting, and quality improvement for health departments, public agencies, healthcare organizations and nonprofits.

Program evaluation

Evaluation plans, logic models, measurement frameworks, data collection, analysis and plain-language reports.

Data analysis and reporting

Data cleaning, measure definitions, program performance and funder reports, dashboards.

Systems integration and data platforms

Connecting case management, scheduling, EHR and reporting tools; data warehouses and BI.

Prometheus ERP

ERP built on the open-source ERPNext: finance, procurement, inventory and operations.

Needs assessments

Existing-data reviews, surveys, stakeholder input, gap analysis and prioritization.

Quality improvement

Current-state assessments, process maps, measures, tests of change and tracking.

Managed IT and cybersecurity

Fully managed or co-managed IT, security assessments, endpoint and email security.

Software and cloud development

Web applications, portals, mobile apps, cloud deployment and workflow automation.

DIFFERENTIATORS

- **Evaluation, data and technology in one team:** findings and the systems that hold the data are handled together.
- **Written scope first:** every engagement starts with agreed questions, deliverables, responsibilities and costs in US dollars.
- **Honest findings:** plain-language reports that state what the evidence shows and what it cannot show.
- **Careful data handling:** least data needed, de-identified or summary data preferred, written data agreements, and a business associate agreement where HIPAA requires one.
- **Handover:** tools, data sets and documentation stay with the client so the work can be repeated.

COMPANY DATA

Name Promatics Informatics LLC
Address 4212 San Felipe Street
Suite 170
Houston, TX 77027
